

# VIRTUAL CLAIMS PAYMENTS MADE SIMPLE

**SIMPLE  
INTEGRATION,  
PROVEN RESULTS**

**INNOVATIVE  
& UNIQUE  
TECHNOLOGY**

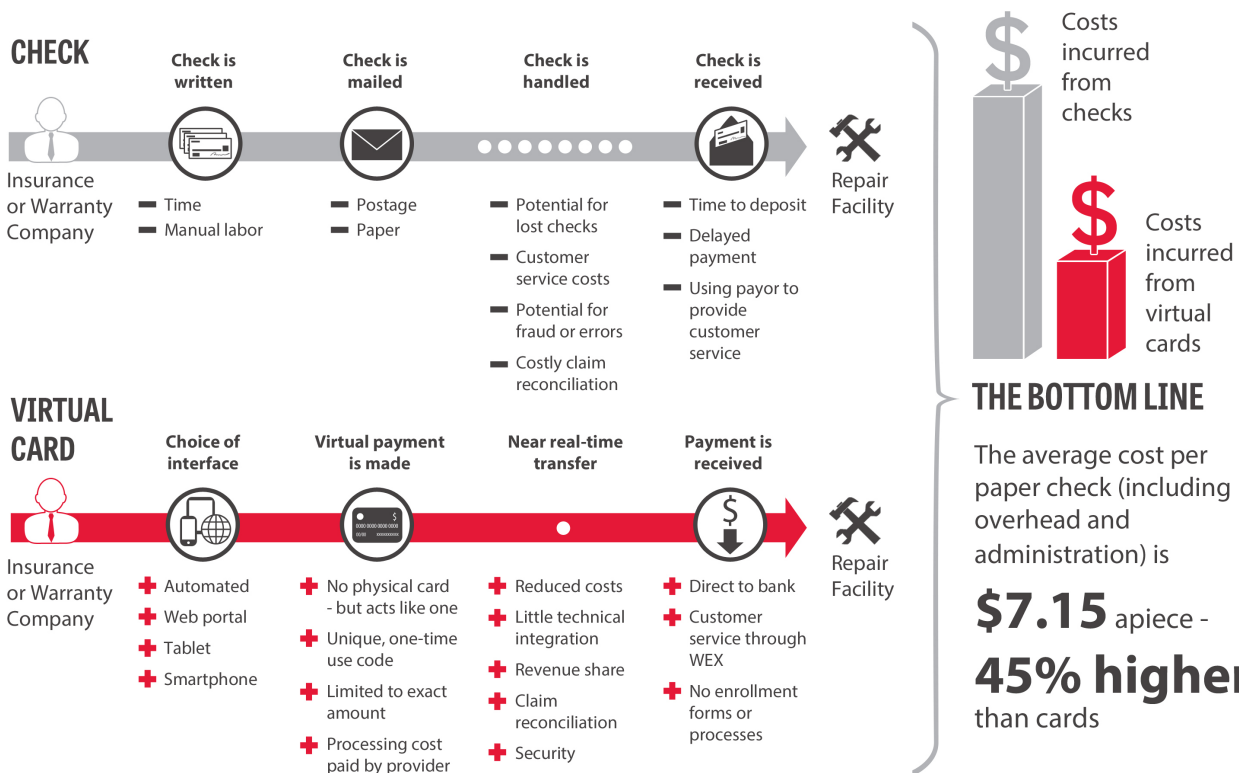

For over a decade, WEX has been leading the way to help customers move to electronic payments for their insurance and warranty claims payment operations. With WEX Insurance payments solution, you'll realize immediate savings from faster claims payment turnaround times, improved payment processes and greater control. Improve customer satisfaction, and drive costs out of your payment operation from day one.

Integrating WEX Insurance payment processing technology with your existing claims management software is simple with industry standard web services protocol, and offers several benefits:

- Allows your claims payment specialists to do their job within a system they know, while making a payment method immediately available for processing
- Payment method does not require registration of supplier bank information like ACH payments
- Payment leverages existing credit card commercial payment systems for broad acceptance
- No up-front or on-going software fees for implementation

**“We tried other solutions with different vendors, [and our] previous attempts did not work. I am very passionate about this when I talk about it because it was a total pleasure to implement. Technically it was already there, there was nothing missing. The technical team is amazing. It was a total pleasure to work with them. The stuff worked.” - Adriam Lobania, IT Director, Phoenix American Warranty**

## THE ADVANTAGE OF VIRTUAL CARD PAYMENTS OVER CHECKS

*We see corporate payments differently.*
